Overview

My research explores (1) how relationships with families and pets affect health and well-being, (2) how we decode nonverbal displays, (3) how nonconscious and conscious beliefs affect judgment and behavior, and (4) how self-concepts influence goals and pro-environmental action, with this work supported over the years by NSF, NIMH, and NICHD grants. My recognitions include being named University Distinguished Professor, Lewis Endowed Professor, University Distinguished Scholar, and Professor of the Year in Psychology. My service to the field includes being Editor in Chief of *Social Psychological and Personality Science*, Associate Editor of both *Journal of Personality and Social Psychology* and *Journal of Experimental Social Psychology*, and President of both the Midwestern Psychological Association and the Society of Experimental Social Psychology. I teach courses in social psychology, positive emotions, the self, conservation psychology, prejudice and minority experience, attitudes, and intergroup relations at both the graduate and undergraduate levels. Finally, my expertise has been applied to environmental conservation, to consumer and medical behavior, to trial consulting, and my scholarship has been presented in many legal venues, including in briefs argued before the U.S. Supreme Court.
